

Henosia

Your visual vibe coding tool

By Janne Jul Jensen

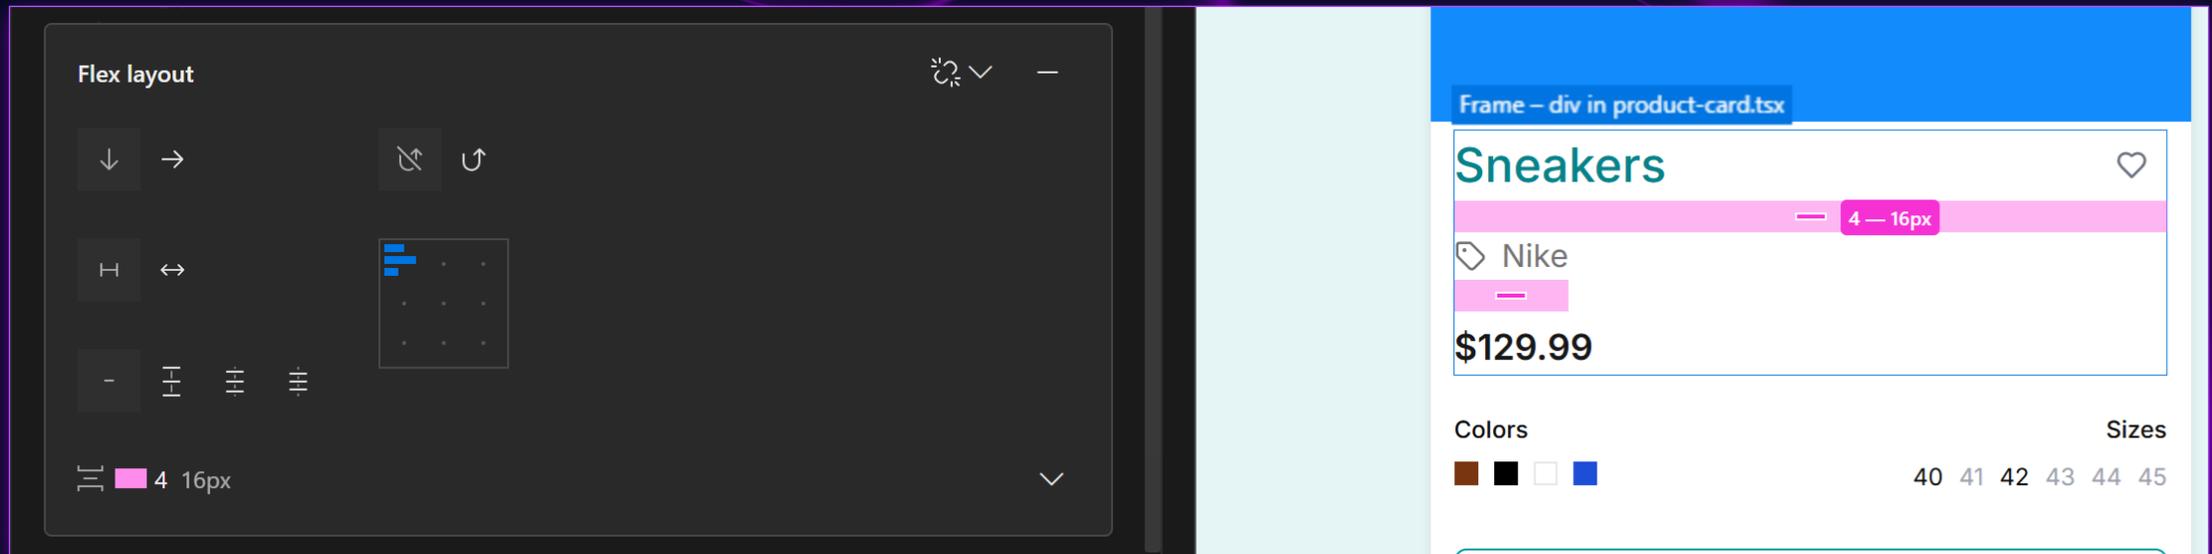

<https://www.henosia.com> • hello@henosia.com

Hvad er vibe coding?

Vibe coding gør det muligt for enhver at bygge software. Hvis du kan beskrive det i almindelig tekst, kan et AI vibe coding tool bygge det. Du behøver ikke løfte en teknisk finger.

Integrationer

1 Supabase project connection

Supabase gives you a backend for your Henosia project, powering features such as login, database, file storage, server logic and more.

2 supabase

Authorize API access for Henosia

Henosia (app.henosia.com) is requesting API access to an organization.

3 Supabase project connection

This project can be connected to a Supabase project:

- CRM 5/7/2025
- Shooos 5/7/2025

4 Supabase project connection

This project is connected to a Supabase project:

- Shooos 5/7/2025

Supabase login using passwords

Adds data connectivity for your pages and password-based signup, login, and password reset.

Supabase login using social accounts

Adds data connectivity for your pages plus social account signup and login.

Basic Supabase connectivity for pages

Adds data connectivity for your pages. For sites and apps that don't require user signups.

1 Publish BETA

To get started, pick a website address that you can publish your project to.

2 Publish BETA

Your project was assigned myhenosiaproject.netlify.app as its website address, but has not yet been built and published.

3 Publish BETA

Deploy complete

Production deploy is live

Deployed to production URL: <https://myhenosiaproject.netlify.app>

Unique deploy URL: <https://68e3bffb0086ac031bca23a--myhenosiaproject.netlify.app>

Build logs: <https://app.netlify.com/projects/myhenosiaproject/deploy/68e3bffb0086ac031bca23a>

Function logs: <https://app.netlify.com/projects/myhenosiaproject/logs/functions>

Edge Function logs: <https://app.netlify.com/projects/myhenosiaproject/logs/edge-functions>

Published to <https://myhenosiaproject.netlify.app>

Last published 10/6/2025 3:11:33 PM

 Jeg er SÅ imponeret!!!! :)

Næsten målløs - og specielt fordi det har dansk ophav!! Noget i den kaliber ville jeg kun forestille mig kom fra the valley :)

The “what if” moment

Now, I could have opened a VS Code as usual and spent hours setting everything up. BUT we are in 2025, vibe coding is here and I wanted to see if I could build a real app faster and without the endless Figma ↔ VS Code shuffle. Usually I use vibe coding for demos and prototypes, but now the goal is to build a REAL functional webapp.

SO I tried three different tools side by side: **Henosia**, **Lovable**, and **Replit**.

Spoiler: Henosia won, but let’s walk through why.

Ehh..hvorfor fik du ikke mig igang med det her før???

Lavede lige ÉN prompt og gå gik i ellers il gang..Det her bliver SÅ spændende at komme i gang med! Og resultatet var lige som jeg ville..Prototyper here I come!!!

..Jammen fuck så vildt det er!

 **Valery Sibikovsky** ✓ @combdn • Sep 2  ...

At this point I think **@HenosiaHQ** is the best vibe coding tool out there. It can run your whole application on its own engine, so it has access to anything: logs, environment files, etc.

And you can point and click on any UI element and update the React code either manually or in the editor. It’s like OpenAI’s canvas in ChatGPT, but from the future.

I think the only downside right now is the tech stack limitation. But this is just the beginning.

Dansk Syn & Skøn

Professionelle Syn & Skøn

Uvildige ekspertvurderinger med moderne teknologi

Dansk Syn & Skøn leverer professionelle syn og skøn med høj faglighed, ensartede rapporter og AI-understøttede processer. Landsdækkende service med to eksperter pr. sag.

Bliv syn og skønsmænd | For advokater & domstole

Hvorfor Dansk Syn & Skøn?

Vi kombinerer faglig ekspertise med moderne teknologi for at levere den bedste service til både advokater og skønsmænd.

- Uvildighed**: To uafhængige eksperter pr. sag sikrer objektive vurderinger og høj troværdighed.
- Ensamlede rapporter**: Standardiseret rapportformat gør det nemt at sammenligne og forstå vurderingerne.
- Landsdækkende**: Vores netværk af eksperter dækker hele Danmark og sikrer hurtig respons.

AI output analyse

Sammenlign og analyser AI-chatbot svar med fokus på bias-detektion og kvalitetsvurdering. Få dybdegående indsigt i forskelle og mønstre.

Bias-detektion | Konsistensanalyse | Kvalitetsvurdering

Vælg dit analyseformål

- Bias-dokumentation**: Identificer og dokumenter bias i AI-svar.
 - Kulturel og demografisk bias
 - Bekræftelsesbias
 - Tidsmæssig bias
 - Kildebias analyse
- Kvalitetsvurdering**: Vurder kvalitet og nøjagtighed af svar.
 - Faktuel nøjagtighed
 - Dækningsgrad
 - Strukturel kvalitet
 - Tonalitetsanalyse
- Komplet Analyse**: Både bias-detektion og kvalitetsvurdering.
 - Alle bias-detektionstyper
 - Fuld kvalitetsvurdering
 - Komparativ analyse
 - Detaljeret rapportering

Hvad du får

- Intelligent Analyse**: AI-drevet sammenligning med tyngende indsigt
- Visuel Highlighting**: Farvekodede forskelle og mønstre
- Chat Assistant**: Persistent hjælp og vejledning
- PDF Export**: Professionelle rapporter med fuld dokumentation
